In this article a complete list of Run Commands in Windows 7 and 8 . These commands allows to quickly access features and applications to customize operative system environment.

These run commands are available for almost all settings available in Windows control panel.

Note : most part of these commands are compatible with Windows 7, Vista e Windows XP.

As someone has kindly reported, some commands are not compatible between different versions. Please check the commands and use the correct ones for your version of the operating system. Technical feedbacks are always appreciated, please send me any info that it helpful to improve this article.

Funzioni	Comandi
Open Documents Folder	documents
Open Videos folder	videos
Open Downloads Folder	downloads
Open Favorites Folder	favorites
Open Recent Folder	recent
Open Recent Folder	logoff
Open Pictures Folder	pictures
Windows Sideshow	control.exe /name Microsoft.WindowsSideshow
Windows CardSpace	control.exe /name Microsoft.cardspace
Windows Anytime Upgrade	WindowsAnytimeUpgradeui
Taskbar and Start Menu	control.exe /name Microsoft.TaskbarandStartMenu
Troubleshooting	control.exe /name Microsoft.Troubleshooting
User Accounts	control.exe /name Microsoft.UserAccounts
Adding a new Device	devicepairingwizard
Add Hardware Wizard	hdwwiz
Advanced User Accounts	netplwiz
Advanced User Accounts	azman.msc
Backup and Restore	sdclt
Bluetooth File Transfer	fsquirt
Calculator	calc

Funzioni	Comandi
Certificates	certmgr.msc
Change Computer Performance Settings	systempropertiesperformance
Change Data Execution Prevention Settings	systempropertiesdataexecutionprevention
Change Data Execution Prevention Settings	printui
Character Map	charmap
ClearType Tuner	cttune
Color Management	colorcpl
Command Prompt	cmd
Component Services	comexp.msc
Component Services	dcomcnfg
Computer Management	compmgmt.msc
Computer Management	compmgmtlauncher
Connessione proiettore di rete	netproj
Connect to a Projector	displayswitch
Control Panel	control
Create A Shared Folder Wizard	shrpwb
Create a System Repair Disc	recdisc
Credential Backup and Restore Wizard	credwiz
Data Execution Prevention	systempropertiesdataexecutionprevention
Date and Time	timedate.cpl
Default Location	locationnotifications
Device Manager	devmgmt.msc
Device Manager	hdwwiz.cpl
Device Pairing Wizard	devicepairingwizard
Diagnostics Troubleshooting Wizard	msdt
Digitizer Calibration Tool	tabcal
DirectX Diagnostic Tool	dxdiag
Disk Cleanup	cleanmgr
Disk Defragmenter	dfrgui
Disk Management	diskmgmt.msc
Display	dpiscaling
Display Color Calibration	dccw

Funzioni	Comandi
Display Switch	displayswitch
DPAPI Key Migration Wizard	dpapimig
Driver Verifier Manager	verifier
Ease of Access Center	utilman
EFS Wizard	rekeywiz
Event Viewer	eventvwr.msc
Fax Cover Page Editor	fxscover
File Signature Verification	sigverif
Font Viewer	fontview
Game Controllers	joy.cpl
Getting Started	gettingstarted
IEExpress Wizard	iexpress
Getting Started	irprops.cpl
Install or Uninstall Display Languages	lusrmgr
Internet Explorer	iexplore
Internet Options	inetcpl.cpl
iSCSI Initiator Configuration Tool	iscsicpl
Language Pack Installer	lpksetup
Local Group Policy Editor	gpedit.msc
Local Security Policy	secpol.msc
Local Users and Groups	lusrmgr.msc
Location Activity	locationnotifications
Magnifier	magnify
Malicious Software Removal Tool	mrt
Manage Your File Encryption Certificates	rekeywiz
Math Input Panel	mip
Microsoft Management Console	mmc
Microsoft Support Diagnostic Tool	msdt
Mouse	main.cpl
NAP Client Configuration	napclcfg.msc
Narrator	narrator
Network Connections	ncpa.cpl

Funzioni	Comandi
New Scan Wizard	wiaacmgr
Notepad	notepad
ODBC Data Source Administrator	odbcad32
ODBC Driver Configuration	odbcconf
On-Screen Keyboard	osk
Paint	mspaint
Pen and Touch	tabletpc.cpl
People Near Me	collab.cpl
Performance Monitor	perfmon.msc
Performance Options	systempropertiesperformance
Phone and Modem	telephon.cpl
Phone Dialer	dialer
Power Options	powercfg.cpl
Presentation Settings	presentationsettings
Print Management	printmanagement.msc
Printer Migration	printbrmui
Printer User Interface	printui
Private Character Editor	eudcedit
Problem Steps Recorder	psr
Programs and Features	appwiz.cpl
Protected Content Migration	dpapimig
Region and Language	intl.cpl
Registry Editor	regedit
Registry Editor 32	regedt32
Remote Access Phonebook	rasphone
Remote Desktop Connection	mstsc
Resource Monitor	resmon
Resultant Set of Policy	rsop.msc
SAM Lock Tool	syskey
Screen Resolution	desk.cpl
Securing the Windows Account Database	syskey
Services	services.msc

Funzioni	Comandi
Set Program Access and Computer Defaults	computerdefaults
Share Creation Wizard	shrpwbw
Shared Folders	fsmgmt.msc
Snipping Tool	snippingtool
Sound	mmsys.cpl
Sound recorder	soundrecorder
SQL Server Client Network Utility	cliconfg

"Windows 7 and 8"? Check your facts! Did you even try and see if commands are working in Windows 7/8 just before changing the title of post to "Windows 7 and 8" to get attention of search engines?

I have Windows 8, I pressed Control+R (Isn't that called "Run"?!) and began with documents, videos, downloads-- NONE of these 3 worked! (Image attached)

Sorry, disappointed. Not happy with un-trustworthy and unverified information. Never expected this from you.

ents'. Make sure you type
